

Revival Skin

DERMERASE®

The Soft Skin Resurfacing Technology

From the home of Revival Skin, comes a cosmetic skin resurfacing treatment that provides minimal impact to the patient with instant and long lasting ongoing results. Dermerase® has been developed and tested over 10 years to ensure the results from this cosmetic treatment is unrivalled.

Pigmentation – Age Spots– Blemishes

The results from only one treatment are astounding, and with little patient downtime, patients frequently return for other treatments.

The Stylish unit fits comfortable in any clinic, with a small footprint or alternatively can be used as a portable desktop unit. Useful storage draws and high quality castors, ensures a professional tidy unit.

Dermerase® also features the post treatment products of Revival Skin, a luxurious and effective range of products to ensure the patient recovers quickly and more importantly nourishes their skin for optimum ongoing results.

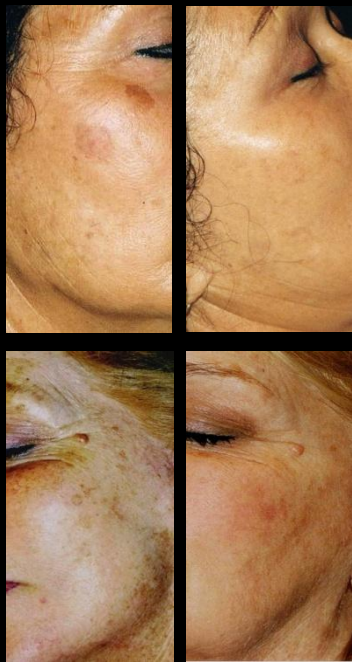

Dermerase is now available to Cosmetic & Beauty Clinics, with attractive start up packages.

**Dr Julie Bradford-Horn, M.B.,B.S.
Cosmetic Physician**

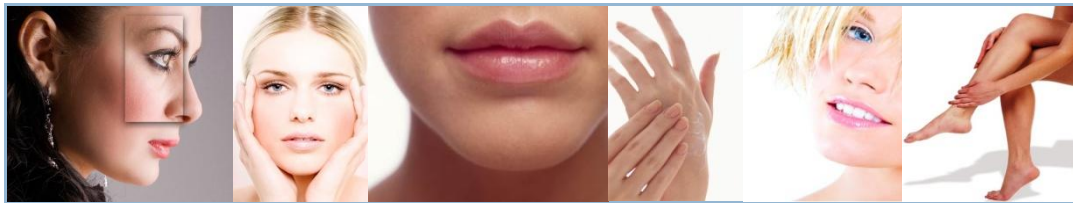

Dermerase is a simple & effective method to remove pigmentation, aged spots and blemishes. It is an outpatient procedure requiring only topical anesthetic. The immediate post treatment is acceptable and the recovery time is short. There are minimal side effects or long term complications. It is cost effective and permanent, it is my first choice in treatment of the above conditions

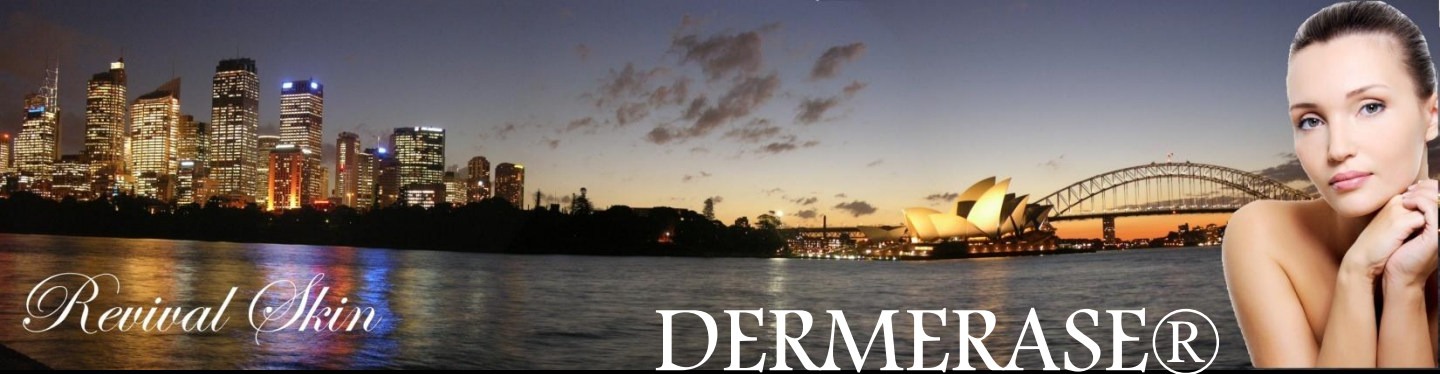

Start up Packages from \$49,950*
